# about us

- Towards the close of 20th century, Ojas Plast rose to revolutionize the Plastic Product Industry. Majorly investing in the business of Metals and Chemicals and products thereof with every passing year Ojas Plast has been radically changing the industry with the most innovative products.

Polypropylene Corrugated sheets are thermoplastic materials with vivid and wide range of properties distinguishing it against other thermoplastic materials. Its physical and chemicals properties provide superior tensile strength and impact resistance. Other properties such as thermal and electrical adaptability makes it suitable for a varied use application ranging from packaging to construction.

Economical, the PP Corrugated sheets applicability makes it a perfect choice in different areas. The sheets are treated on both sides providing a greater finish and compatibility to digital or traditional ink printing. The Corrugated sheets are used in variety of industries such as advertising, in construction purpose, as a shielding layer all this is possible because of its composite high quality 3-ply structure which are available in different sizes, thickness and colours depending upon the requirement.

SAFETY SIGNS

## ● FLOOR & TILES PROTECTION

Sheets are designed to provide reusable temporary floor protection for many fixtures and surfaces during construction. The sheets offer excellent surface, tile, vinyl and wooden floors. The sheets are easy to apply and costeffective

## ● WALL & DOOR PROTECTION

The sheets offer excellent surface protection for walls, corridors, glass windows, doors, counters and cabinets during construction and renovation. We can customize the sheets to any requested size or color. The sheets are also available in a transparent version, which will not block the daylight when placed on glass.

## ● WATERPROOF MEMBRANE PROTECTION

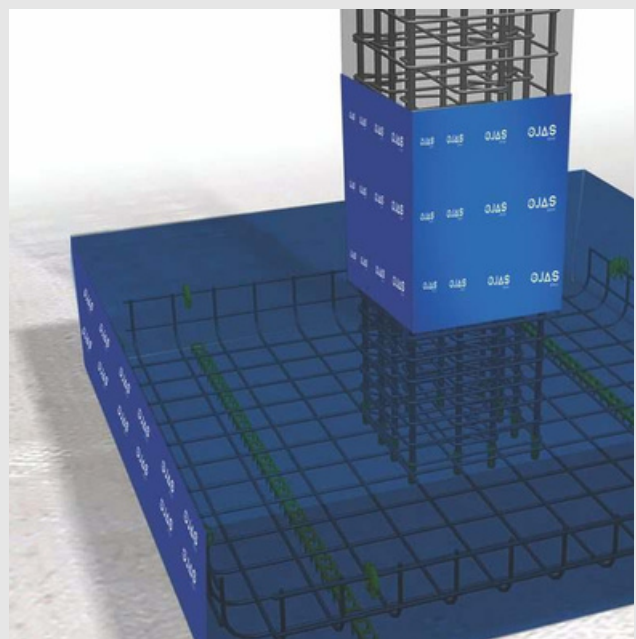

Sheets are waterproof and shock-resistant and are often used to protect membranes against liquids, humidity, punctures, scratches and shocks. These sheets can be produced with an extra high puncture resistance in order to make the protectant even stronger.

There are many ways to apply the sheets on a surface. For example, these sheets can simply be placed on top of hot asphalt before it cools down or a solvent-based glue can be applied as an adhering agent between the surface and the protection sheet. Mineral oils, solvents, acids and bases do not affect this sheet.

## ● BEAM FORMS

Boards are often used to make concrete or cement foundations. The concrete can be applied to the beam forms directly. We can supply any puncture resistance or thickness in order to make the beam form as solid as required.

# PACKAGING

## ● PRODUCT PACKAGING

There are many advantages of using corrugated sheets as a packaging material for your products. A few of the reasons why our customers choose this sheet packaging include the fact that it is waterproof, strong, printable, lightweight, and reusable.

## ● LAYER PADS

Logistics companies use our pallet partitioning in order to divide their products, keep them from being damaged, and to stack their product in a more stable manner. Let us know what pallet size or logo you require, and we'll be happy to make a sample.

# STORAGE

## ● RECYCLE BINS

Recycle bins are used for exhibitions and events, as well as in hospitals and schools. They are easy to fold, lightweight, hygienic, and low cost. The recycle bins are fully customizable.

## ● TRAYS AND TOTES

Trays and Totes can be produced in any requested shape and with personalized artwork. Send us your design, and we would be happy to create a strong tray or tote for you. These products are often produced for courier companies as mail totes, or for farmers as waterproof vegetable or fruit trays.

## • SAFETY SIGNS

Sheets are widely used as warning signs, temporary road signs, “house for sale” signs, and for many other signage purposes. Signs made out of plastic corrugated sheets are cost-effective, lightweight, and surprisingly durable.

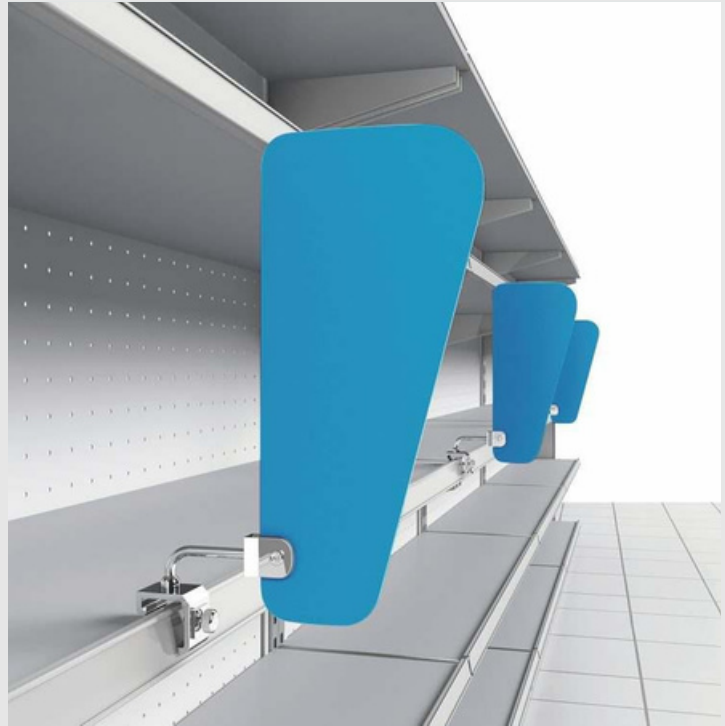

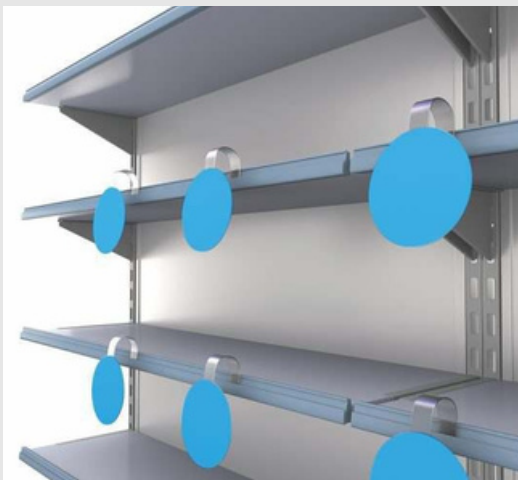

# ADVERTISING

## • ADVERTISING DISPLAYS

Whether you need an advertising display for a supermarket or a cinema, Advertising displays are always a great medium to deliver your message.

## • PRINTABLE SHEETS

Sheets are widely used in the printing and display industry. The sheets can be supplied with a corona treatment, which allows customers to print or the sheets directly. Another option is to glue printed artwork onto the surface.

## PP CORRUGATED SHEET

- Extremely lightweight & durable
- High degree of weather, oil and chemical resistance
- Resistance to impacts and scratches
- Totally eco-friendly owing to 100% re-cyclability
- Easy to handle and convert
- Works great for graphics and printing jobs

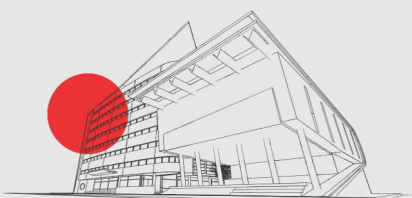

## TECHNICAL SPECIFICATION

Material :	Polypropylene
Thickness :	2mm-6mm
Width :	Up to 1300mm
GSM :	250 - 2200 GSM
Color :	Multiple
Fire :	Fire-retardant customisation available
UV :	UV resistance customisation available
Chemical :	Non-reactive to majority of chemicals
Recycle :	100% recyclable
Electrostatic :	Anti-static Discharge

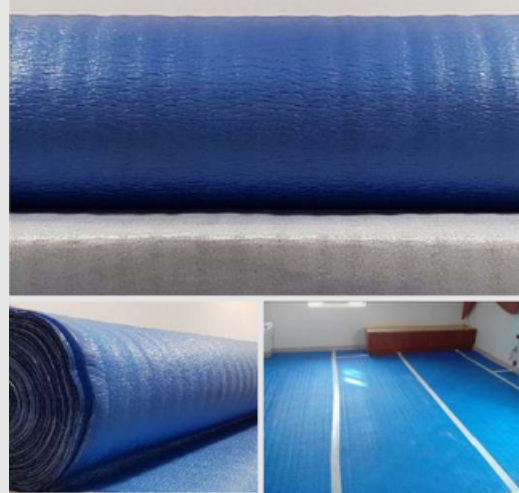

High-grade 3 ply PP Corrugated sheet is an advanced PP Corrugated sheet, specially developed for adverting, packaging, material protection and building construction industry. A 3-ply sheet is available in multiple color options, thickness and sizes. these sheet diligently treated on both sides for a better finish and excellent results from ink printing,

## EPU FORM ROLL

Material :	EPU
Thickness :	2MM & 5MM
Width :	1400 MM
length :	40 Meter
Color :	Blue
Packaging :	Roll

Sheets are designed to provide reusable temporary floor protection for many fixtures and surfaces during construction. The sheets offer excellent surface, tile, vinyl and wooden floors. The sheets are easy to apply and cost effective

## BUBBLE GUARD SHEET

Cost :	Economical
Structure :	Sheet & Roll foam
Application Time :	Fast & Easy
Readliness of surface after application :	Immediate & ready to use
Protection after application :	Complete floor protection
Durability :	Long
Skill :	Do application yourself
Maintenance :	One time application for floor protection
Atmosphere :	Clean working atmosphere
Usages :	Multiple time use
Removal :	Do it yourself
Water Resistance :	Water proof
Handling :	Easy to carry / remove
